

Modular Coiler Set – MCS

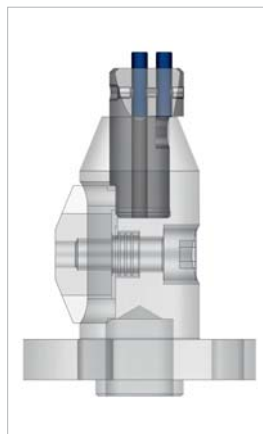

Optimization of Costs through Modularity

Description

The modular coiler set for Wafios machines of series FMU and FMK allows through its free configurability the highest possible flexibility during the production process for an attractive price. Via the easy configurability, short set-up times and the comfortable replacement of worn out parts cots cuttings can be realized quickly.

▲ Modular Coiler Set with pins

▲ Modular Coiler Set with Coiler head

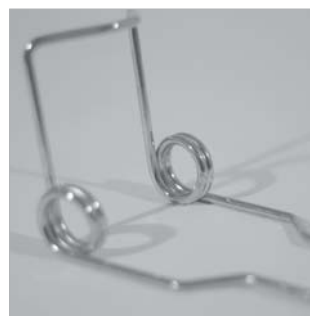

▲ Tool box

Machine Types:

- FMU 1
- FMU 1.2
- FMU 1.7
- FMU 16
- FMU 2
- FMU 2.2
- FMU 2.7
- FMU 25
- FMK 2
- Further types in development

Our Accomplishments for your Benefit

- Cost cuttings by universality and short set-up times
- Freely configurable coiling and bending tool
- Flexible tool solution through quick tool exchange
- Neatly arranged set in a tool box
- Interchangeability for machines of the same machine type series
- All components available individually
