

Successful Presentation at the Wire & Tube Show in Shanghai 2014

WAFIOS participated with great success in the Wire & Tube China in Shanghai on September 23 - 27. Six state-of-the-art machines for bending wire and producing compression and torsion springs were exhibited on a surface of 250 m². The machines were presented by employees from WAFIOS and WAFIOS Shanghai Machinery (WSM). Especially the new torsion spring coiler FMU 16 and the wire bending machine BM 60, which premiered in China, were very well received and generated much interest.

A lot of visitors from China and Asia could be greeted at the booth during the four-day fair. They contributed to the success at the show. At the end of the fair, the WAFIOS team was pleased to register new machine orders and many promising inquiries and customer contacts.
